DETAILED ACTION

Allowable Subject Matter

1. With regards to the after final amendment filled on 01/13/11 claims 7-11 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The applicants disclose an ultra-wide band communication system. In which an encoder operable to encode a k-bit information bit train to an n-bit encoded bit train at a coded rate of (k/n) ("k" is a natural number not less than 1, and "n" is a natural number not less than 2), on condition that m-piece pulses are transmitted per one bit of information bits ("m" is a natural number not less than 2) and the coded rate is (k/n) . Also a transmitting unit is operable to generate n-piece repetitive pulse trains based on the n-bit encoded bit train encoded by then encoder, thereby transmitting sequentially the n-piece repetitive pulse trains to the communication path. The n-piece repetitive pulse trains are formed based on the perforce and effects of the bit in accordance with a state of the communication path. The system also adaptively adjust the number of repetitive pulse trains according the effect of the communication path. The combination of the mentioned features are not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
